interWavs	:: The Power	of Excellence	:: Problems	sending	outaoina	Emails	;
mitor trays		OI EXCENSION		SCHAILIG	OGLACIIIA		

If you have <u>trouble sending outgoing emails</u>, then most probably it is due to one of these two reasons:

- If you want to use an **outgoing (sending) address that is different from your assigned interWaysMAIL**address, then you need the "**Persona**"
feature

(please see our pricing pages).

Persona

enables you to use your old email address as outgoing/sender address.

- Are you using the correct SMTP (outgoing mail server) settings, especially ports and encryption/authentication? You can find the exact details needed in our support section -->server settings.
